

Brian Castelli

BIOGRAPHY

As the President & CEO of the Home Performance Coalition, Brian T. Castelli brings 30 years of state, national and international experience in the energy field, including expertise in energy efficiency, renewables, emission reductions, municipal water efficiency, and electricity demand reduction. Previously as the Alliance to Save Energy's Executive Vice President and then Senior Fellow, he focused on energy efficiency programs in the United States as well as Asia and the Middle East. Prior to joining the Alliance in July 2005, Brian ran his own energy consulting firm and was the California Energy Commission's Washington, DC representative.

As an appointee of President Clinton, Brian served as chief of staff to the U.S. Department of Energy's (DOE) assistant secretary for energy efficiency and renewable energy from 1994 to 2001. He managed 550 staff members and more than \$1 billion in programs and research, development and deployment initiatives and directed the development and implementation of energy policies and programs. Brian also led and participated in missions to Western Hemisphere, European and former Soviet Union countries and was deeply involved in developing energy-efficiency measures for the eventual closure of the nuclear reactors in Chernobyl, Ukraine.

Prior to DOE, Brian was appointed in 1988 by Gov. Bob Casey to the Pennsylvania Energy Office (PEO). As executive director he was responsible for the Commonwealth's energy policies and programs, managed the state energy office and the Pennsylvania Energy Development Authority and took the lead on responding to energy emergencies.

Castelli holds two degrees from the University of Pennsylvania — a bachelor of science in chemical engineering and an MBA in industrial/environmental management from the university's Wharton School.
